

Open Future Consortium

Newsletter #1

ABOUT THE PROJECT

The project focuses on improving the key entrepreneurial competencies, skills, and employment potential of secondary vocational school students.

The beneficiaries of the project can be all other interested secondary schools (VET and general education).

Starting from the kickoff meeting

We started our activities in December 2023.

From the beginning, our project has been encouraging students to immerse themselves in problem-solving skills, critical thinking and collaborative practices by facing real-world challenges. Some of materials are completed and ready for stakeholders.

Which deliverables you can download as of today?

1. IPM - Informative- promotional material
2. Descriptors of entrepreneurial competencies
3. Guidelines for trainers
4. Tool for assessment of the current state of entrepreneurial competencies

Upcoming event

LTT program: all teachers from partner schools will be trained to acquire a common philosophy for training their students, to act as facilitators in the application of learning materials to acquisition of key entrepreneurial competencies of their students.

What do we intend to achieve ?

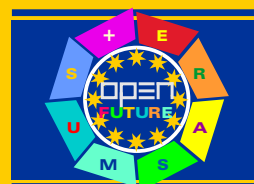

Building entrepreneurial capacity and mindset to help future entrepreneurs turn their ideas into action.

We will develop many skills that will boost the self-esteem and confidence.
